

R&M Data Center Boot Camp

August 16 - 18, 2016 at The University of Tennessee

To enable a safe, reliable (highly available), maintainable, energy efficient Data Center from a facility infrastructure viewpoint.

NEW

FOR DATA CENTERS

“The ability of a system to meet demand when called on to perform.”

- Why R&M is Important to Data Centers
- What Does a World Class Data Center Look Like
- An Intro to High Performance Computing and It's Infrastructure
- The Importance of Precision Maintenance
- Benefits of PM Optimization
- Data Center Security
- SCADA Monitoring and Control
- Best Practices /. Design for Reliability & Maintainability
- Precision Cooling
- Predictive Technologies
